Shawn

Your "bonding" question is a good one. As a matter of policy, EDA used to require fidelity bonding (or the equivalent insurance) to cover those personnel with access to the EDA disbursements. This requirement was contained in the Uniform Administrative Requirements (and the EDA Standard Terms and Conditions). However, the language contained in both of these documents has become less defined (they have both have been updated, the T&C as recently as February 2016).

Let me follow-up with our Regional Counsel on this issue and get back to you.

Hi Brian,

Attached is a first draft of the quarterly progress report. As the report states, we are in the process of reviewing the procurement procedures so I have left some of the dates for design and construction blank. Any feedback you have for this initial report would be great.

In addition, we have a question regarding Bonding from our last call. Per the agenda item, "personnel handling funds must be covered by fidelity bonding." In the attached document we only found insurance and bonding as it pertains to property (page 42). Is there additional information you can direct us to for this requirement?

Thank you,

SHAWN JENSEN
