Shawn,
I did finally read your massive lease with the Port and the case you are making to the Port for having them join your non profit in its pursuit of a grant from EDA. I must reiterate that this issue of having the Port be a co-applicant is brought to you as an alert to prepare you for what will probably come as a request of you if you would be serious in pursuing a grant from EDA. We have not made this request as of this date. Additionally, the process of having a co-applicant is set out in the EDA grant application requirements. I am not the individual who would make this request nor am I the individual who would make a final determination on the quality of the non profit or the Port's efforts to modify the process or the documents that would allow you to satisfy this requirement. That determination and process must be or is traditionally guided by an EDA attorney.
I would continue to encourage you to pursue this matter with the Los Angeles City Harbor Department directly.

Subject: Document for Port

Hi Wil, Happy New Year!

In our recent conversations with the Port, they have requested a document which they can show their Board to ensure them that what we are trying to accomplish is within the terms of our lease, and aligns with both our missions. Although this information is in both the lease and the application, hopefully this document will simplify things. I compiled the following information and feel it accurately demonstrates that their participation is necessary. Could you please review this and let me know if there are any items that are inaccurate, missing or unnecessary? We are trying to resolve this issue once and for all.

Thank you,

SHAWN JENSEN
