Subject: RE: AltaSea EDA Award Amendment Request

Hi Char,

Thank you, I received the original document thru FEDEX. It will be added to the action items lining up for our review, however, as discussed earlier today during your phone call to me, an estimate of the scope being added or modified is needed to evaluate the degree of change and to determine the appropriate action needed, please send them to EDA Seattle Office, Attn. to me.

BTW, you do not need to copy our legal counsel for future communication regarding this project. EDA project officer is the grant/project main point of contact, previously Brian Alvis, now myself. If legal action is required, we will handle it internally. Likewise, we also need to ensure we are communicating to the proper main point of contact from the grant recipient side. Our file still has "Ms. Jenny Krusoe as the main point of contact. You have mentioned in telephone conversations before and with the recently received letter that you are representing the grant recipient, however, I do not have any document stating this authorization and do not know the extent of scope of this authorization. I noticed you copied Tim in the email here, is he the PM of this project now? or is the Project Management services under your company – Glaser Weil? The original letter of request for project scope change and time extension was directly sent from Glaser Weil not Alta Sea, without any Alta Sea contact copied. Please clarify, we need proper communication line and information for the record.

Thank you for your understanding and cooperation!

To: Charuni Patibanda <cpatibanda@glaserweil.com>
Subject: RE: AltaSea EDA Award Amendment Request

Hi Char,

I completed the review of the documents submitted to EDA for the request of time extension and scope of work change.

An amendment 1 for time extension requested is on process. I should be able to send it early next week.

The proposed change in scope have been reviewed. I did not get your estimate for the changes but in the essence of time since the project is already short in project time schedule, I went ahead and looked at the amount for removal of the modular restroom. I believe that this deductive amount for the modular restrooms of over \$400,000 is sufficient for the addition of the interim electrical plan. The repair on the long stretch of berth 57.5 to 60 may also be possibly not as extensive as what was going to be repaired on berth 57.5 and even if it will end up to cost more, I noted your assurance that should the project experience an over run above from the total project budget of \$8,588,000, Alta Sea assures EDA that it will fund any remaining or overrun amount. I therefore agree to the changes in your scope of work. You may go ahead and finalize drawings with the proposed changes.

Have a good weekend!
